

Save time and increase your coding compliance with expansive referential and regulatory content.

Trying to find the information you need to code correctly and understand complicated regulatory information is cumbersome and time-consuming — especially when you have to sift through multiple government websites. We’ve compiled thousands of Medicare and Medicaid documents, local and national Medicare policy information, and dozens of Optum360<sup>o</sup> reference books into one easily searchable database to provide you easier and faster answers to your coding reference questions.

**Access content from Optum360, Medicare, Medicaid, fee schedules, forms, LCD/NCDs and coding content.**

**Easily toggle between Optum360, Medicare, Medicaid and code search results.**

**Filter search results by source and date published.**

**Simply click on one of the search results to open the document. Then, MedicalReferenceEngine.com automatically finds your search term and scrolls right to it.**

**New features:**

- **Deleted Code Detail Page**  
Now you are able to reference all of the materials that were pertinent to the code while it was active. This can be invaluable for retrospective reviews and audits.
- **Ability to view RVU data on the Code Detail page**  
With this addition, users can access the code detail page by the code or the RVU icon from the Code Range page.
