

RevenueCyclePro.com

The online coding tool for hospitals

The hospital revenue cycle is affected by frequent regulatory changes, a high volume of claims, increasingly complex hospital billing and reimbursement rules, and ongoing coding changes — all of which make it difficult to stay compliant.

A single source to meet your coding, billing, coverage and reimbursement needs

RevenueCyclePro.com is a comprehensive, online problem-solving tool that compiles the critical reference data hospitals need to increase efficiency across the entire revenue cycle. RevenueCyclePro.com provides:

- Access to a complete library of medical code sets, UB-04 billing and coding tips, and reimbursement information to address problems that are core to hospital revenue cycle processes
- A simplified research process that boosts productivity, featuring a search engine that helps you quickly find codes you are looking for — using acronyms, abbreviations or medical terms, and exclusive code crosswalks and coding tips that provide quick links from clinical codes to CMS source documentation, billing and reimbursement information
- Provides historical data for the previous eight quarters, allowing the user to resolve older claim problems using the codes, as well as the billing and coverage rules, in effect at the time
- Tools to help you resolve your most prevalent coding and billing errors and prevent rejections by using the latest UB-04 data set and Medicare billing guidelines, as well as revenue codes linked to CPT[®]/HCPCS codes
- Complete, updated Part A and Part B LCD policies, medical necessity data, and national coverage policies (NCDs) with crosswalks to CPT[®]/HCPCS, ICD-10/ICD-9-CM revenue codes and billing code types to help you manage the ABN process and reduce denials

Quickly access medical code sets and vital referential information and tips related to Medicare and UB-04 billing.

RevenueCyclePro.com goes beyond the basics.

In addition to convenient, online access to up-to-date coding content, the comprehensive set of reference tools in RevenueCyclePro.com helps you address many of the shortfalls that often result in claim rejections, denials and underpayments. The value-added, accurate and updated coding content and references, edits, crosswalks and links help users reduce denial rates and the time it takes to code and bill, while improving revenue cycle performance indicators.

RevenueCyclePro.com robust features include:

Optum360® CodeLogic™ search engine. Search using keywords across all diagnostic and procedural code sets simultaneously for hospital outpatient and inpatient reporting.

APC calculator. A sophisticated outpatient calculator helps you validate and manage outpatient APC and composite APC reimbursement under Medicare, identify and resolve underpayments and determine the patient's copayment amount.

Clinical documentation guidelines. Proprietary documentation by Optum360 promotes higher levels of coding. The documents are linked to the applicable diagnosis and procedure codes.

Essential DRG calculator. The DRG calculator gives you a more accurate DRG-level payment rate using hospital-specific DRG calculations for each DRG, based on the operating and capital values in effect for each provider number.

A robust compliance editor and ABN generator tool, powered by Optum Claims Manager Facility, scrubs at the claim level for Medicare, Medicaid and commercial compliance, enabling you to capture and correct errors before submittal for fewer denials and provides official LCD, NCD and CCI source material based on date of service, which can assist in the denial resolution process. Additionally, this tool can be used to generate an advanced beneficiary notice (ABN) for patient signature.

DRG Grouper Calculator Add-on available. Group diagnosis and procedure codes to DRGs using the same EasyGroup™ logic that many major industry systems are using. Obtain provider-specific reimbursement, including outliers, for the DRG using the powerful add-on tool.

ICD-10-PCS Code Builder. Easily identify codes within this complex code system (or code set). This intuitive electronic format helps you understand the relationships between root operation, body system and section.

Uniform Billing Editor eBook. Now you can directly access the comprehensive Uniform Billing Editor eBook for definition of and requirements for each Field Locator. Understand billing structures such as Type of Bill Codes and Revenue Codes, and access proprietary UB-04 billing and coding tips that address problems that are core to hospital revenue cycle processes.

Use RevenueCyclePro.com to:

- Quickly access the data and medical code sets needed to capture outpatient and inpatient reimbursement
 - Answer questions about coding, billing, coverage and reimbursement
 - Resolve edits, problems and issues related to the codes and other data reported on the claim to minimize noncompliance exposure
-

Maximize your coding compliance efforts.
